

INSIGNIA LIMITED TANZANA
MANAGE ENGINE DOCUMENTATION
PREPARED BY: KELVIN CHRISTOPHER
DATE: 13th February 2026

1. Introduction

This technical report documents the implementation, configuration, and operational status of **ManageEngine Endpoint Central** deployed at **Insignia Limited TZ**.

The purpose of this system is to provide centralized endpoint management, software deployment, security enforcement, and asset visibility across the organization's IT infrastructure.

2. System Overview

- Deployment Model: **On-Premises**
- Hostname: END-POINT-SERVER-INSIGNIA
- IP Address: 172.16.10.102
- Operating System: **Windows 11 Pro**
- Database: Built-in PostgreSQL (Default Endpoint Central DB)
- Web Access: Browser-based console

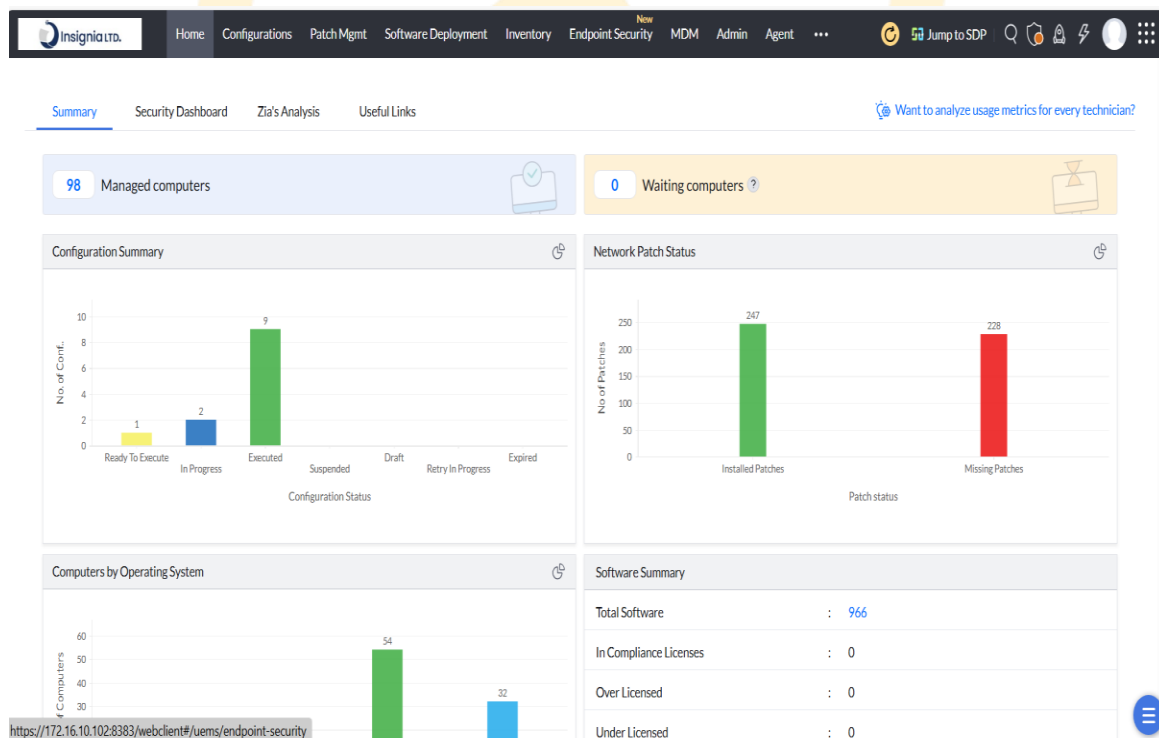

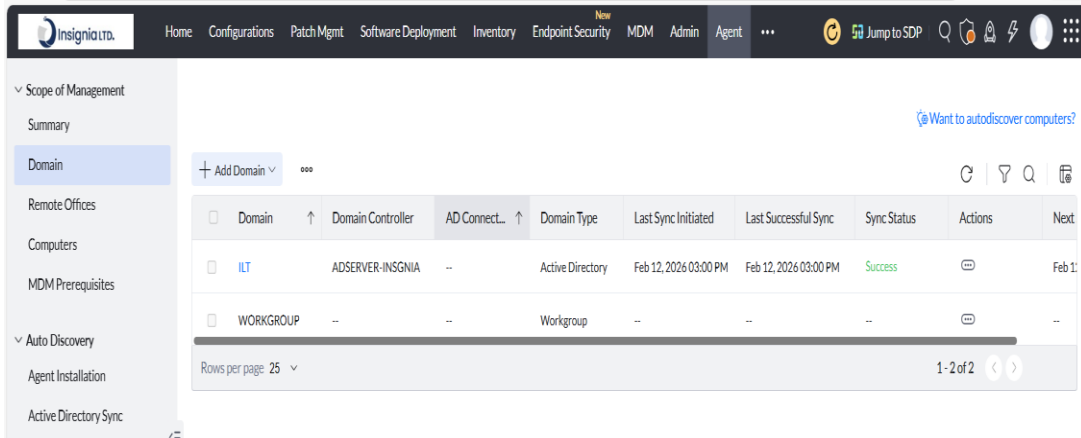

fig 1.0: endpoint central dashboard

3. Active Directory Integration

Endpoint Central is integrated with Active Directory to:

- Discover domain-joined computers
- Synchronize Organizational Units (OUs)
- Enable automatic agent deployment
- Associate devices with users

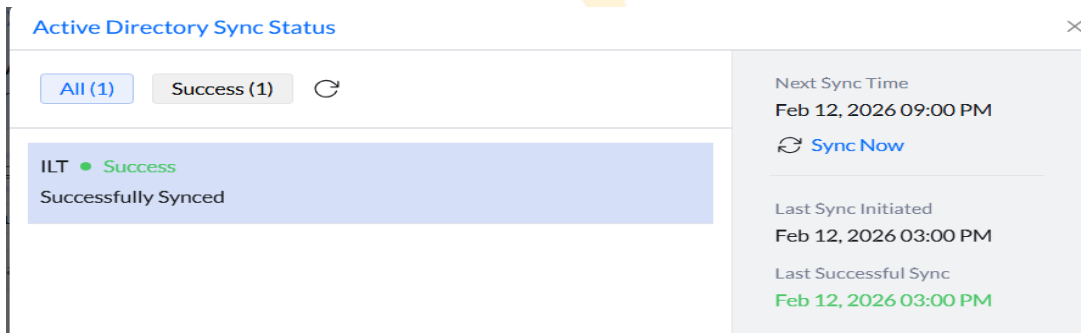

The screenshot shows the 'Active Directory Sync' section of the Insignia ITM interface. On the left is a navigation menu with options like 'Scope of Management', 'Domain', 'Remote Offices', 'Computers', 'MDM Prerequisites', 'Auto Discovery', 'Agent Installation', and 'Active Directory Sync'. The main area displays a table of domains. A link at the top right says '(a) Want to autodiscover computers?'. Below the table, it says 'Rows per page: 25' and '1 - 2 of 2'.

Domain	Domain Controller	AD Connect...	Domain Type	Last Sync Initiated	Last Successful Sync	Sync Status	Actions	Next
ILT	ADSERVER-INSIGNIA	--	Active Directory	Feb 12, 2026 03:00 PM	Feb 12, 2026 03:00 PM	Success		Feb 12, 2026 09:00 PM
WORKGROUP	--	--	Workgroup	--	--	--		--

fig: shows ILT domain, joined in manage engine

4. AD Synchronization Settings

- Domain Status: Reachable
- Scheduled Sync: Enabled
- Sync Frequency: 6 Hour
- Scope: Selected ILT Domain
- Authentication: Domain Admin Credentials

The screenshot shows the 'Active Directory Sync Status' dialog. It has a tab 'All (1)' and a filter 'Success (1)'. The main content shows 'ILT' with a green dot and the text 'Successfully Synced'. On the right, there is a summary box with the following information:

Next Sync Time	Feb 12, 2026 09:00 PM
Sync Now	
Last Sync Initiated	Feb 12, 2026 03:00 PM
Last Successful Sync	Feb 12, 2026 03:00 PM

fig 1.1: show synchronization details

5. Agent Deployment Strategy

1. Remote Push Installation
2. Manual Installation (fallback)

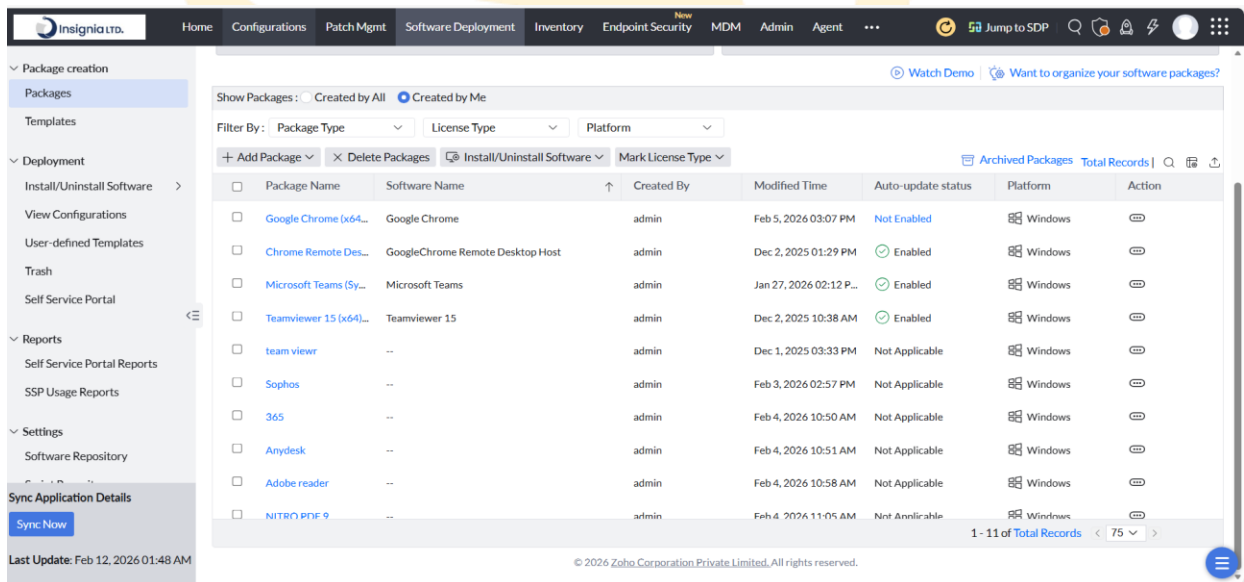

5.2 Agent Communication

- Agents communicate securely with the server.
- Only systems with active agents are counted as **Managed Computers**.
- Current License Count: **98 Managed Devices**

6. Software Deployment Framework

The following applications are deployed automatically:

Software	Deployment Type	Execution Mode
Sophos Endpoint Protection	Automated	System Account
Microsoft Teams	Automated	System Account
Office 365	Managed Deployment	System Account
Adobe Reader	Repository-based	System Account
Chrome browser	Automated	System Account

The screenshot displays the 'Software Deployment' section of the Insignia LTM interface. The left sidebar shows navigation options like 'Package creation', 'Deployment', 'Reports', and 'Settings'. The main area shows a table of software packages with columns for Package Name, Software Name, Created By, Modified Time, Auto-update status, Platform, and Action. The table lists various applications like Google Chrome, Microsoft Teams, and Adobe Reader, along with their deployment status and update settings.

Package Name	Software Name	Created By	Modified Time	Auto-update status	Platform	Action
Google Chrome (x64...	Google Chrome	admin	Feb 5, 2026 03:07 PM	Not Enabled	Windows	
Chrome Remote Des...	GoogleChrome Remote Desktop Host	admin	Dec 2, 2025 01:29 PM	Enabled	Windows	
Microsoft Teams (Sy...	Microsoft Teams	admin	Jan 27, 2026 02:12 P...	Enabled	Windows	
Teamviewer 15 (x64...	Teamviewer 15	admin	Dec 2, 2025 10:38 AM	Enabled	Windows	
team viewer	...	admin	Dec 1, 2025 03:33 PM	Not Applicable	Windows	
Sophos	...	admin	Feb 3, 2026 02:57 PM	Not Applicable	Windows	
365	...	admin	Feb 4, 2026 10:50 AM	Not Applicable	Windows	
Anydesk	...	admin	Feb 4, 2026 10:51 AM	Not Applicable	Windows	
Adobe reader	...	admin	Feb 4, 2026 10:58 AM	Not Applicable	Windows	
NITRO PDF 9	...	admin	Feb 4, 2026 11:05 AM	Not Applicable	Windows	

fig 1.2: shows software deployment

Automation Work flow

Dynamic Custom Groups are configured based on OU criteria:

Workflow:

New Computer Joins AD

AD Sync Detects Device

Device Joins Dynamic Custom Group

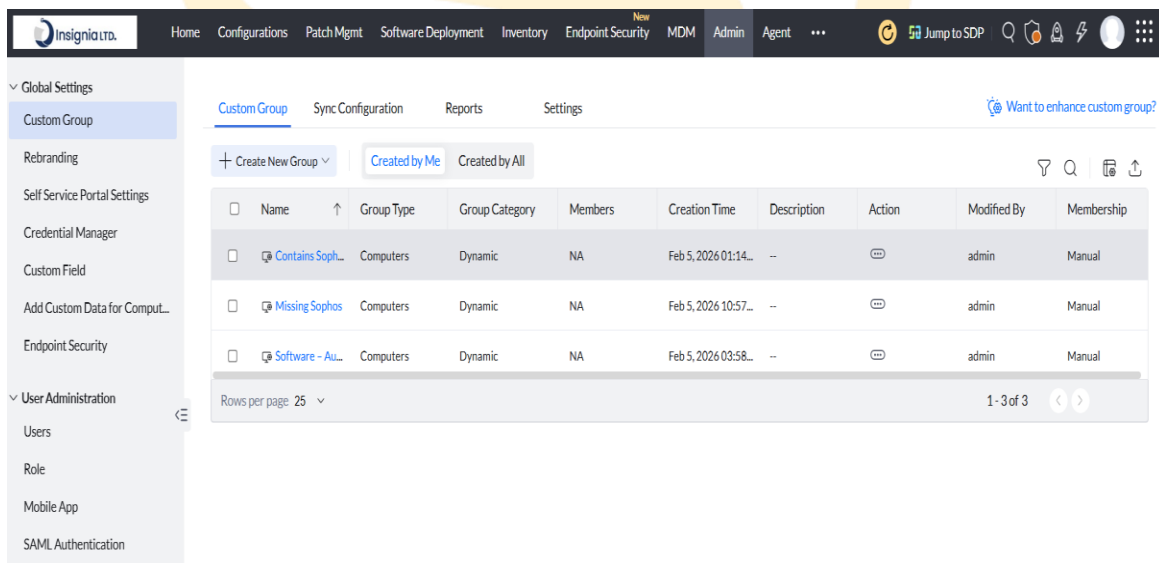

Automation Template Executes:

- Agent Installation
- Other software installation

Deployment settings include:

- Retry on failure enabled
- Installation at system startup
- Silent installation parameters

☐	Name	Group Type	Group Category	Members	Creation Time	Description	Action	Modified By	Membership
☐	Contains Soph...	Computers	Dynamic	NA	Feb 5, 2026 01:14...	--		admin	Manual
☐	Missing Sophos	Computers	Dynamic	NA	Feb 5, 2026 10:57...	--		admin	Manual
☐	Software - Au...	Computers	Dynamic	NA	Feb 5, 2026 03:58...	--		admin	Manual

fig1.3: shows Custom groups configurations for automation

7. Custom Groups Configuration

Dynamic Custom Groups are created under:

Global Settings → Custom Groups

Criteria:

- AD OU-based filtering
- OS-based filtering (Windows 10 / 11)

This allows automated configuration targeting without manual intervention.

8. Inventory & Asset Management

- Managed Devices: 98 (Licensed)
- Additional Discovered Devices: Present in Inventory but do not consume licenses

Inventory tracks:

- Hardware specifications
- Installed software
- OS version
- Last logged-on user
- Device status

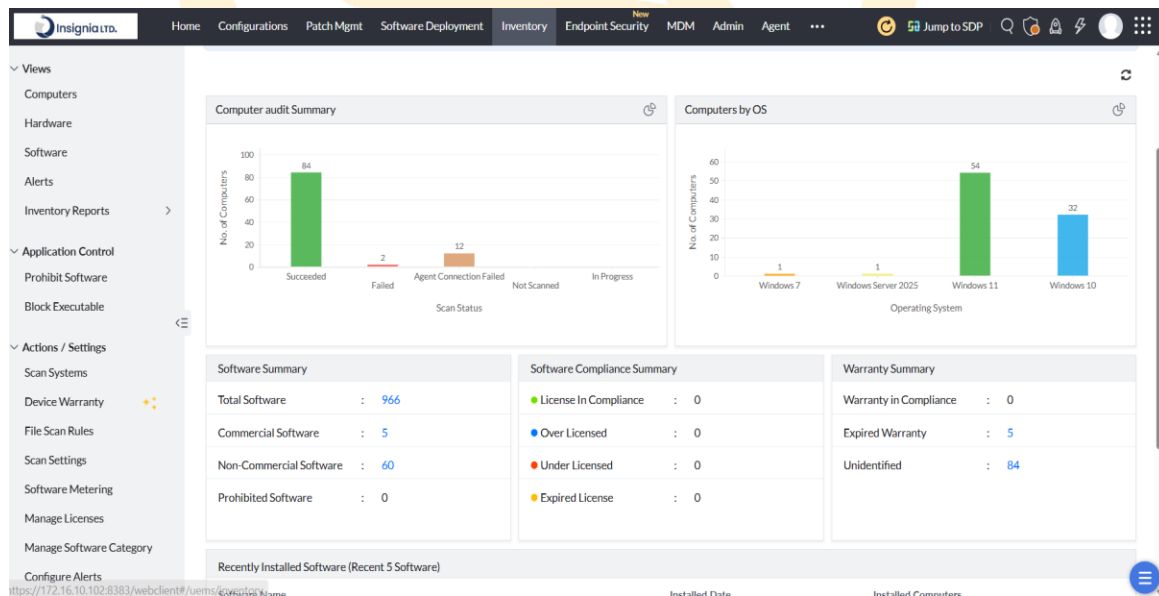

fig 1.4: show Inventory Tracking

8.2 Reporting Capabilities:

Available reports:

- All Computers Report
- Software Inventory
- User-to-Computer Mapping
- License Utilization
- Audit Logs

9. Security Implementation :

Patch management enabled for:

- Windows Updates
- Critical security patches

9.2 Audit Logging

System logs track:

- Deployment actions
- Login activity
- Configuration changes
- Remote sessions

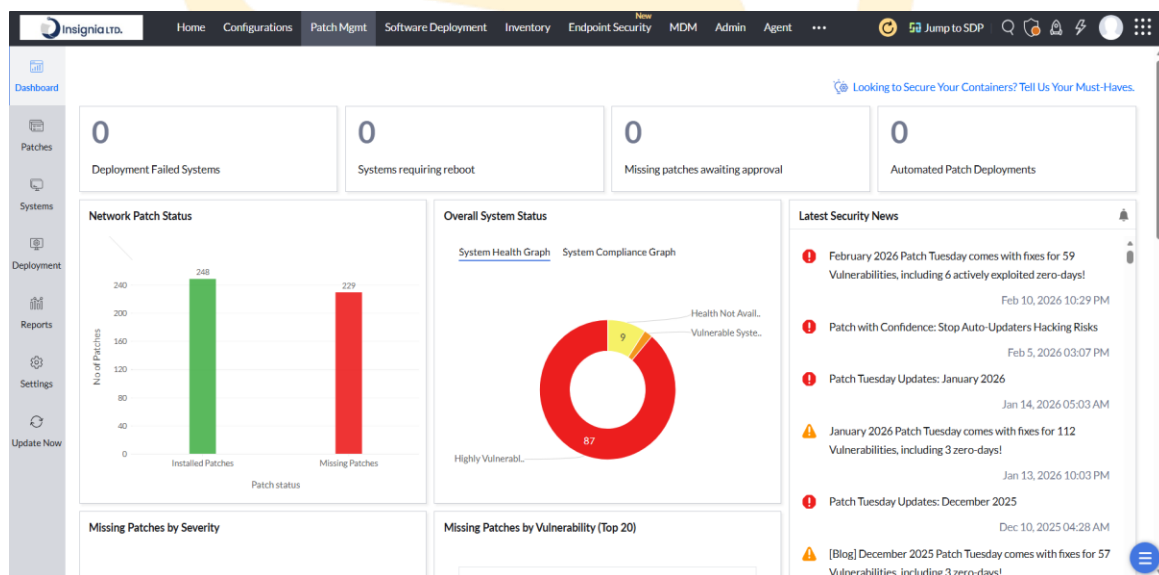

Fig 1.5: shows patch dashboard

10. Remote Management Capabilities: Tools →

Features enabled:

- Remote Desktop Control
- File Transfer
- Command Prompt Access
- System Tools Execution

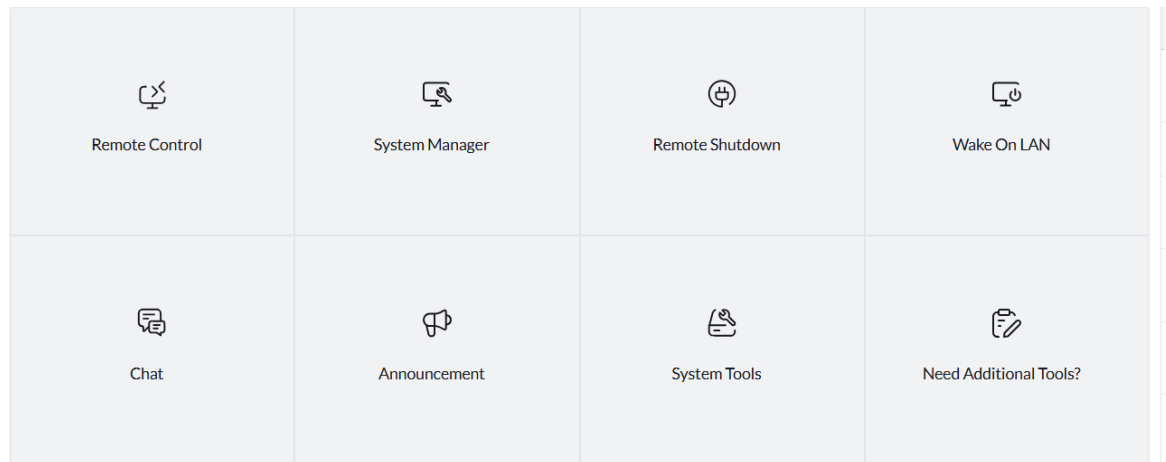

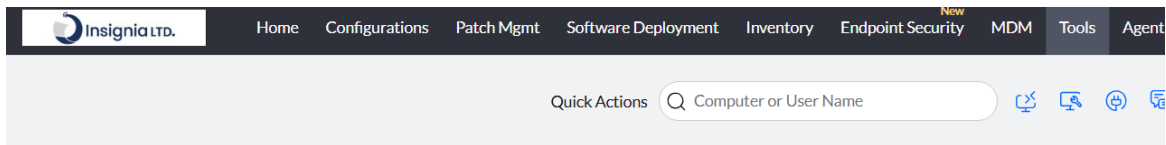

fig 1.6: shows remote control Tools

11. System Performance & Monitoring:

This section shows how well the system is running.

Include:

- Server resource utilization (CPU, RAM, Disk)
- Agent communication health
- Endpoint resources (Ram, Disk)

12. Observations

- Legacy Windows 7 endpoints
few computers still use windows 7, which has reached end of support

13. Operational Procedures

Use this when a device does NOT appear automatically via Active Directory sync.

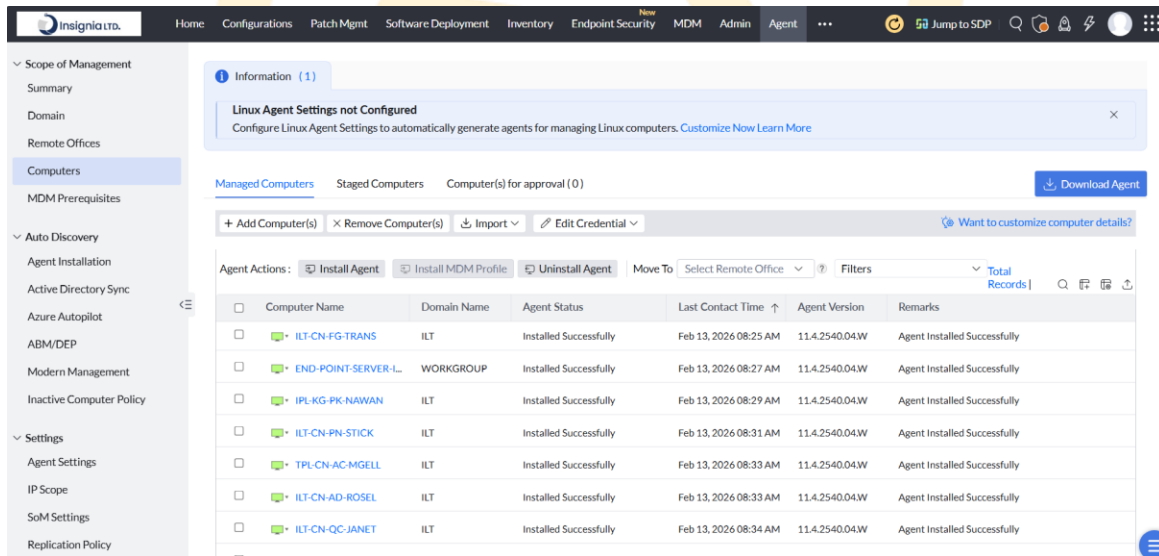

Step 1: Add Computer

Admin → Scope of Management → Computers → Add Computer

Enter:

- Computer Name
- Domain / Workgroup
- Administrator Credentials

Click **Add**.

The screenshot shows the Insignia LTO web interface. The left sidebar has a 'Computers' section highlighted. The main content area shows a table of managed computers. The table has columns: Computer Name, Domain Name, Agent Status, Last Contact Time, Agent Version, and Remarks. All computers listed have an 'Installed Successfully' status. A top navigation bar includes links like 'Home', 'Configurations', 'Patch Mgmt', 'Software Deployment', 'Inventory', 'Endpoint Security', 'MDM', 'Admin', and 'Agent'. A top right bar includes a 'Jump to SDP' button and a search icon.

Computer Name	Domain Name	Agent Status	Last Contact Time	Agent Version	Remarks
ILT-CN-FG-TRANS	ILT	Installed Successfully	Feb 13, 2026 08:25 AM	11.4.2540.04W	Agent Installed Successfully
END-POINT-SERVER-1...	WORKGROUP	Installed Successfully	Feb 13, 2026 08:27 AM	11.4.2540.04W	Agent Installed Successfully
IPL-KG-PK-NAWAN	ILT	Installed Successfully	Feb 13, 2026 08:29 AM	11.4.2540.04W	Agent Installed Successfully
ILT-CN-PN-STICK	ILT	Installed Successfully	Feb 13, 2026 08:31 AM	11.4.2540.04W	Agent Installed Successfully
TPL-CN-AC-MGELL	ILT	Installed Successfully	Feb 13, 2026 08:33 AM	11.4.2540.04W	Agent Installed Successfully
ILT-CN-AD-ROSEL	ILT	Installed Successfully	Feb 13, 2026 08:33 AM	11.4.2540.04W	Agent Installed Successfully
ILT-CN-QC-JANET	ILT	Installed Successfully	Feb 13, 2026 08:34 AM	11.4.2540.04W	Agent Installed Successfully

A computer becomes “Managed” only after agent installation.

Manual Agent Installation

If remote push fails:

Admin → Scope of Management → Agent → Download Agent

Install manually on the computer

Deploy Software to Computer.

Software Deployment → Install/Uninstall Software → Create Configuration

Steps:

1. Select software package
2. Select target computer or group
3. Choose deployment schedule
4. Configure reboot policy
5. Deploy

Monitor Deployment Status

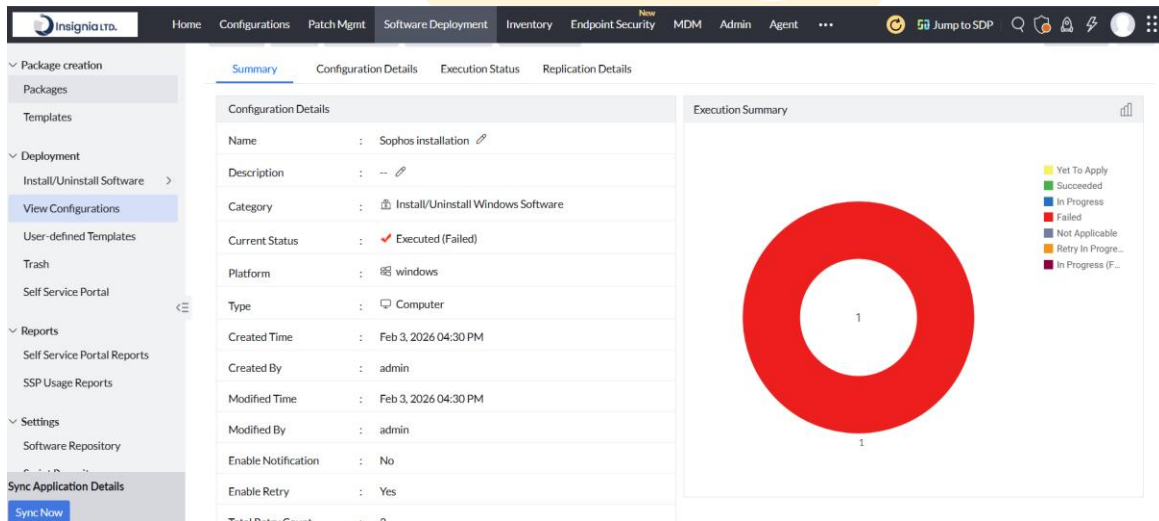

Software Deployment → Deployment Status

Check:

- Success
- Failed
- In Progress

If failed:

- View error details
- Retry deployment

The screenshot displays the Insignia MDM Software Deployment interface. The left sidebar shows a navigation menu with categories like Package creation, Deployment, Reports, and Settings. The main content area is divided into two panels: Configuration Details and Execution Summary.

Configuration Details:

Configuration Details	
Name	Sophos Installation
Description	--
Category	Install/Uninstall Windows Software
Current Status	Executed (Failed)
Platform	windows
Type	Computer
Created Time	Feb 3, 2026 04:30 PM
Created By	admin
Modified Time	Feb 3, 2026 04:30 PM
Modified By	admin
Enable Notification	No
Enable Retry	Yes

Execution Summary:

The Execution Summary panel features a donut chart showing the status of the deployment. The chart is predominantly red, indicating a failed status. A legend on the right side of the chart defines the status colors: Yet To Apply (yellow), Succeeded (green), In Progress (blue), Failed (red), Not Applicable (grey), Retry In Progress (orange), and In Progress (F...) (purple). The chart shows 1 failed deployment.

Create Automation for New Computers

To auto-install software when new PC joins:

Configuration → Templates → Create Template

Add:

- Software Install Configuration
- Patch Configuration
- Security Policies

Target:

- Dynamic Custom Group

Generate Reports

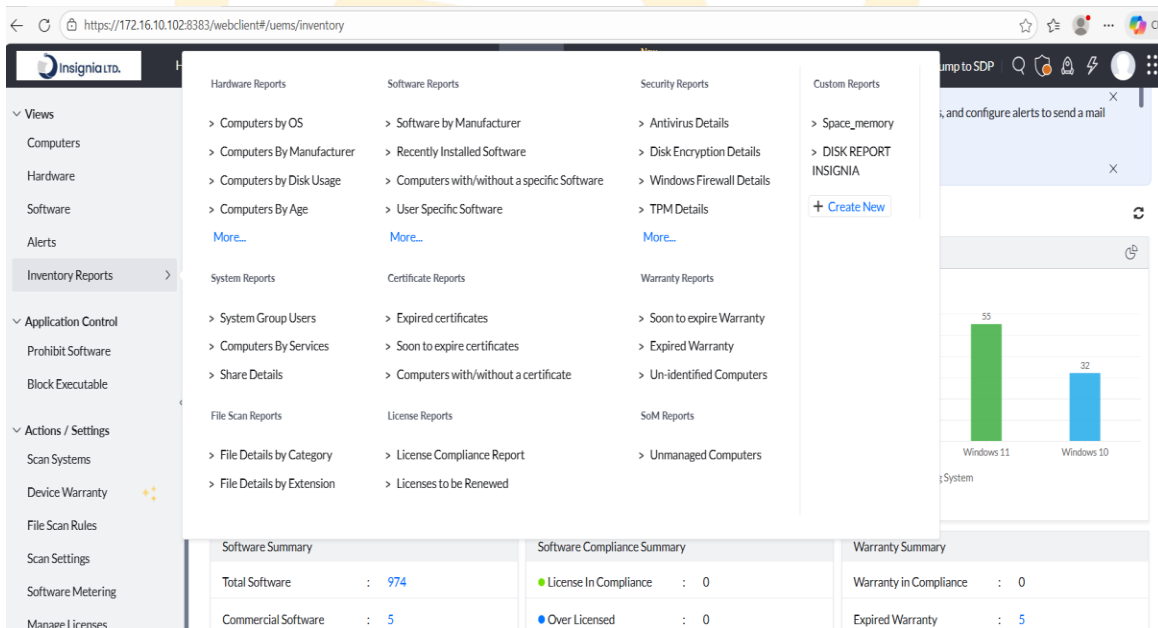

- **Computer Inventory Report**

Reports → Inventory Reports → Computers

Click **Export** (CSV / PDF).

- **Software Installed Report**

Reports → Inventory Reports → Software

Remote Troubleshooting

To assist a user:

Tools → Remote Control → Select Computer → Connect

Features:

- File Transfer
- Command Prompt
- System Manager
- Registry Editor

Remove / Decommission a computer

If device is no longer in use:

Inventory → Computers → Select Device → Delete

Also:

Uninstall agent from client machine.

14. Conclusion

The implementation of ManageEngine Endpoint Central at **Insignia Limited TZ** provides centralized control over endpoint security, software distribution, and IT asset management.

The current configuration supports automated onboarding of new domain devices, centralized antivirus deployment, and comprehensive inventory visibility.

The system is operational, integrated with Active Directory.
